

Variable Credit Hour Registration Instructions

Banner 9 registration defaults to the **MINIMUM** number of credit hours for variable credit courses. The student must change the credit hours to what they want between the min and max allowed **AFTER** registering.

To make this change of hours, students will then need click the fourth tab across the top, which is **Schedule and Options.** Here they will click the **3 or whatever hour that is underlined** and change it to the desired credit hour.

The full demonstration starts at the 3 minute mark on this video.

The student can go in and change their hours in Banner 9 Registration up until the 1st day of the respective term. If they are completing all of these steps and are still having trouble or the hours aren't underlined and aren't able to be changed, then they should contact their advisor.
